There's good news!

Nearly 98% of all kidney transplants, 90% of liver transplants, and 85% of heart transplants are successful;
More than 1,800 organ transplants were performed in Canadian hospitals in 2000;
Donor families say they are comforted by the feeling that their loved one's death was not in vain.
This gives Canadians all the more reason to take the time to make their wishes known either by filling out their province's organ donor card or registering their wishes through a provincial registry.
